GUIDE**

Market research

GREAT LAKES BY DESIGN is a design publication intended for an affluent and upscale consumer audience throughout major markets in the Great Lakes region. Although the affluent and wealthy consumer may be defined by a high-accruing annual income or based on a high net worth, U.S. households with a minimum net worth of \$1 million comprise nearly 12 million households in the country.

In 2019, for the 10th consecutive year, the number of wealthy U.S. households reached a new high as stated by the Market Insights Report 2019 by Spectrem Group. Increasing two-and-a-half percent in 2018, the number of U.S. households with a net worth between \$1 million and \$5 million, not including primary residence, now stands at 10.23 million.

Customized, personalized products and services rank high on the priority list of affluent consumers, which are defined in the study as adults with a household income of \$250,000 or more, according to the 7th edition of *Affluent Consumers: Demographic Patterns and Spending Trends*.

There is also evidence that the mass affluent population in the U.S. is comprised of upper-middle class individuals and households, with top expenditures in areas like: vehicle and boat, travel, personal insurance, home and garden, electronics, and home entertainment. In 2017, the top five percent of American wage earners made between \$150,000 and \$200,000. Consumers between the ages of 45-years-old and 54-years-old have a mean household income of \$109,366 before taxes, the highest of all age variables, according to a Consumer Expenditure Survey by the Bureau of Labor Statistics from 2018.

This group spent the most on owned dwellings as well as major appliances and floor coverings. The age group before, from 35-to-44, spent the largest mean amount on food and alcoholic beverages, while the age range after, from 55-to-64, spent the most on repairs and maintenance to the home. In general, spending on food increased two-and-a-half percent in 2018, both at home and away from home, according to the Bureau. Housing expenditures also increased one percent.
